5

# Weather

*Since year 2005 many events have happened on Earth. Through the years from electing George Bush for the president of the USA in 2004 to the year 2023 (till now) the climate on our planet has changed.*

30.12.15  
6

# Homes

*In 2010 people created a new technology. It was artificial intelligence called 'Sky Net'. It was a computer used for building houses with artificial intelligence.*

30.12.15

7

# People vs. Aliens

*In 2017 technology became so advanced that humans could travel through the universe without any trouble. We should remember that since 2004 we have discovered three new planets called Alf, John, and Eric. In 2015 NASA sent an ultrasonic signal into the universe, in the hope to invite other civilizations to our mother Earth.*

30.12.15

8

# *New inventions*

*In 2025 scientists created a lot of great inventions. Here are some of my favourites.*

*The first is a robot. This machine could do almost everything. It could cook, clean, talk etc. And everyone could afford it.*

30.12.15

9

# Health & Beauty

*In the year 2026 scientists discovered a new cure. It was a great cure for almost all diseases known to humankind up to 2015. In the year 2027 the Earth suffered from an outburst of a virus called P.I.G.G.Y N.O.S.E. It's called like that because when you are sick with the Piggy Nose virus your nose becomes pink and you are sneezing all the time. This disease lasts 24 hours.*

# 2005 - Weather

*Since year 2005 many events have happened on Earth. Through the years from electing George Bush for the president of the USA in 2004 to the year 2023 (till now) the climate on our planet has changed. In the cause of progressing colonization of the Earth,*

30.12.15  
12

*the ozone hole has increased so fast that it is hard to imagine. Scientists noticed that fact too late! The ozone hole has grown so big that solar beams could get through the Earth without any problem. The ice of the North Pole couldn't resist the melting power of the sun. The North Pole was unavoidably going to disappear from the face of the Earth. It was only a matter of time when almost 80% of world cities could end up their existence under water. Because of the ice melting the water level would increase about a half in a short time. To prevent this situation people started sending the excess of water to the Earth orbit in special mega big bottles!*

*That stopped the catastrophic flood. But it wasn't over yet. The melting of the North Pole ice started a global warming. I should say that the climate on Earth turned upside down. In Africa, America and Asia, where temperatures were always extremely high, now it was snowing and the temperature have dropped to  $-30^{\circ}\text{C}$ . In Africa people were dying because they weren't prepared for a winter like this. Dead bodies of men, woman and even children were lying everywhere. The freeze didn't spare anybody. In Canada and in Russia the temperature reached even to  $+38^{\circ}\text{C}$  in autumn! The casualty list wasn't as big as it was in Africa but all plants had died and people living there were out of food, so they would*

30.12.15

14

die too

*Five years passed since the catastrophe.*

*When I was doing interviews with people that survived, and when I was asking whether it was difficult to live in the new climate the answers were mostly the same: "At first it was difficult to live in that Spartan conditions, but now we have got used to that" they said with a smile. After these events ecology become nr1 problem in every discussion. A new organization was established to take care of ecology problems. Over 98 million people died in the catastrophe.*

*Borys Szumański*

# 2005 - Work

*There isn't much new in working. Teachers are teaching as they used to in 2005. Workers, miners, football players, actors, singers do their work without much difference to 2005.*

30.12.15  
16

*But there is a very big change in pay and in the way of doing these jobs. In schools there is a computer on every desk. Students don't have to take books to school as they did in 2005. The whole material is on their personal computers (PC). Kids get their homework on a CD. They do it at home and bring it to the teacher. He checks it on his PC and mails it to the computer on the student's desk. If something is wrong in the mines there are human-looking robots at hand. Robots are steered by the miners sitting in a special control room. It is a very safe way of digging because even if something goes wrong the robots will die instead of men.*

30.12.15

17

*But if computers work instead of humans the pay is lower.*

*So nowadays every man has to work two jobs to earn enough money for food, clothes, cars and other goods.*

*The most popular job of our times is a computer electrician.*

*Sometimes when one computer is damaged the whole work is stopped for long hours. These days time is the most*

*expensive thing. Only a small group of people can work for*

*Quick Corp. It's a firm that repairs computers in a very short*

*time. Their motto is: "We'll help you in a minute". And it is*

*really true but nobody knows what the secret is.*

***Borys Szumański & Damian Błaszczyk***

30.12.15

18

# 2010 - Homes

*In 2010 people created a new technology.*

*It was artificial intelligence called 'Sky Net'. It was a computer used for building houses with artificial intelligence. For example – a fridge could buy food, a TV set could find your favourite channel and computers did anything you told them.*

*It also provided security for your house.*

*In 2010 cars could fly and float on water. The streets could move and people didn't have to walk.*

*Dawid Schulz*

30.12.15  
19

# 2014 - Beliefs Christianity

*In year 2014, in Vatican,  
people saw white smoke  
over St. Peter's Square.*

*A new pope had been  
chosen. The pope's name  
was John Paul III and he  
was from Poland. He was  
59 when he was chosen.*

30.12.15  
20

*By 2020 the new pope healed the world dramatic situation. During the first six years of his pontificate he visited almost every country in the world. He gained access to Mother Russia and Christianized this region. He founded a new charity organization called The Blue Cross of Maria of Nazareth in short BCMN. This organization takes care of people in need.*

30.12.15  
21

*In the same year he prevented a global war.*

*He went with a group of Christians to the battlefield. They made a living chain. That caused a meeting of the fighting armies and a peace treaty followed.*

*After that people of the entire world loved him and they still do.*

*Borys Szumański & Damian Błaszczyk*

*&*

*Wojtek Strzelczyk*<sup>30.12.15</sup>

# 2015 - Clothes

*In 2015 the most popular clothes are jeans and*

*tracksuits. The most popular firms are: Majki,*

*Adihasz and Jeebok.*

*Fashion is inspired by*

*1990s and fashion creators design old looking*

*clothes. Businessmen and older people wear jeans.*

30.12.15  
23

*Tracksuits are popular with young people.*

*The best fashion creator is Jakub Krawczyk.*

*Leather is very boring and nobody wears it.*

*The most popular colours are black, white and red.*

*Nobody likes brown, orange or yellow.*

*Daniel Rolczak & Dawid Schulz*

30.12.15

24

# 2017 - People vs. Aliens

*In 2017 technology became so advanced that humans could travel through the universe without any trouble. We should remember that since 2004 we have discovered three new planets called Alf, John, and Eric. In 2015 NASA sent an ultrasonic signal into the universe, in the hope to invite other civilizations to our mother Earth. In 2019 Aliens responded. Our scientists were very glad!*

30.12.15  
25

*They thought that aliens would tell them something different about science. But they were wrong!!! Aliens came to our planet but they didn't come in peace. They had about 20,000 of fighters. Our government waited till the very last moment before starting the war. But when the aliens destroyed the Eiffel Tower the general didn't have much choice. The fighters from the whole wide world formed a big world fleet. A special group composed of presidents from every country in the world was constituted in London. The human race was nearly destroyed and dead. We were losing the war. But we discovered a special weapon - it was a gun using gamma sonic plasma. We had a weapon but the war wasn't over yet. The 99% of the aliens died but a small group of hunters survived. Our weapon didn't have any effect on them. They were still killing our men. We didn't know how to kill them.*

30.12.15  
26

*They had the ability to disappear and they were so powerful that they could kill 30 people with their own hands. When all hope had been gone, star warriors came from the space with light sabers and they killed the aliens. But they also lost a lot of soldiers. People had to start their whole lives from the beginning. But they were finally safe. We invented a weapon that could kill the aliens in case they ever come back to Earth again.*

*Szumański & Jakub Krawczyk*

30.12.15  
27

# 2025 - Biofood

*In 2025 people became obsessed with beautiful body. Scientist found vegetables which smelled and tasted like real food. They were smaller than real food and they weighed much more than real food. You didn't become fat after eating them. Greentables tasted like apples or grapes, redtables – like strawberry or tomatoes, yellowtables – like potatoes or bananas.*

30.12.15  
28

*If you liked apples you could buy tables tasting like apples and if you liked grapes you could buy tables tasting like grapes. The choice was yours. In 2025 real food didn't exist. People ate tables which looked like vegetables. Production of tables was very cheap and nobody bought expensive real food. Animals like cows or pigs were extinct, only dogs, cats, birds and fish survived. People didn't pay for tables – they were for free.*

**Daniel Rolczak & Dawid Schulz**

30.12.15  
29

# 2025 - New inventions

*In 2025 scientists created a lot of great inventions. Here are some of my favourites. The first is a robot. This machine could do almost everything. It could cook, clean, talk etc. And everyone could afford it. But the government decided to use it in the army.*

30.12.15  
30

*Its military version can do even more: fight, defuse bombs, and it can think. A new main computer was created for this model. So it isn't a normal robot anymore. It became an artificial intelligence. Governments used this special robot to strengthen their armies. It is my favourite invention. Another invention is a new technology of producing computer games. It works like this: if you want to play some games you must put a special helmet on your head. And you are off to the virtual world. You can do everything you want. You can fight, learn, and kill. And this is very funny. It is used in the army too. With this special invention soldiers are trained in tactics and can practised fighting skills.*

30.12.15

31

*I think this is a great invention for young people.*

*The third of my favourite inventions is a flying car. These machines are very useful because you can move everywhere.*

*You can fly over oceans, mountains and deserts. But it is a very expensive invention so only rich people can buy it. But not only cars can fly. Trains and tanks can fly too.*

*The fourth of my favourites are Star ships and travels between planets. This was only a small step to discover the universe but a great achievement for scientists. Next of my favourite inventions is a special program with a helmet for learning. It is a very, (I will say it again), very good invention.*

*You can learn at home.*

30.12.15

32

*You only have to put a special helmet on your head in the morning. And that's all. You don't have to go to school. But it is very expensive so if you aren't rich this is not for you.*

*The sixth is an engine that works on all type of fuel. I like it because it is very useful. If you have this engine in your car you can spare a lot of money.*

*Finally the last of my favourite inventions is a treatment for cancer and HIV. For medicine it is a big step forward. I think it gives hope to those who have lost the chance of recovery. And this is a great victory over the illness.*

**Jakub Krawczyk**

# 2026 - Health & Beauty

*In year 2026 scientists discovered a new cure. It was a great cure for almost all diseases known to humankind up to 2015. They also discovered a medicine that could cure a broken arm or leg in just a week! The richest and the most respected man on Earth called Erdvin made these great discoveries.*

30.12.15  
34

*There isn't much information about this guy. All we know is that he is a genius but a little bit crazy according to people who have worked with him. He has always been very talented - even in his young years. When he was 10 he built an apparatus for freezing blood- he has frozen about 5 people. Now he is nominated to his second Nobel Prize. He has got his first Nobel Prize for his work on minimization. Thanks to it doctors can minimise themselves and go into their patient's body to heal him from the inside.*

30.12.15

35

*In year 2027 the Earth suffered  
from an*

*outburst of a virus called  
**P.I.G.G.Y N.O.S.E.** It's*

*called like that because when  
you are sick with the*

*Piggy Nose virus your nose  
becomes pink and you*

*are sneezing all the time. This  
disease lasts 24*

*hours. But it is very dangerous.*

30.12.15  
36

*If you have a Piggy Nose and you don't stay at home you can even die. You have a week time ahead of you and, to prevent death, you have to do very strange things. For first two days you have to eat only pink and orange things. On the third day you have to jump on one leg wherever you go.*

30.12.15  
37

*On the fourth and the fifth day you have to paint your room some crazy colours. On the sixth day your family have to sing pop songs to you for at least 2 hours. On the seventh day you are probably cured. (You should consult your doctor or a pharmacist before getting this treatment).*

*Borys Szumański & Damian Błaszczuk*

30.12.15  
38

# 2030 - Sports

*In 2030 the most popular sports are football and F1 racing. Snooker and baseball are popular sports, too. The best football team in the world are Popaks and the best F1 driver is David Schulz.*

30.12.15  
39

*Football is most popular in  
Europe and*

*South America. F1 is most  
popular in*

*Europe and Asia and baseball  
is most*

*popular in Asia, the USA and  
Canada.*

*Snooker is popular all over the  
world.*

*Dawid Schulz*
